

Dataset: Iris Flower dataset

(a) setosa

(b) versicolor

Note: Only two species of flower are displayed

$\chi^2_{\text{Pearson}}(2) = 21.34, p = < 0.001, V_{\text{Cramer}} = 0.82, \text{CI}_{95\%} [0.41, 0.68], n = 32$

In favor of null: $\log_e(\text{BF}_{01}) = -10.31$, sampling = independent multinomial, $a = 1.00$

Fuel efficiency by type of car transmission

$t(18.33) = -3.77, p = 0.001, g = -1.38, \text{CI}_{95\%} [-2.17, -0.51], n = 32$

Transmission (0 = automatic, 1 = manual)

In favor of null: $\log_e(\text{BF}_{01}) = -4.46, r_{\text{Cauchy}}^{\text{JZS}} = 0.71$

AIC = 166, BIC = 173, log-likelihood = -78

X = correlation non-significant at $p < 0.05$

Adjustment (p-value): None

X = correlation non-significant at $p < 0.05$

Adjustment (p-value): None

Dataset: Iris

X = correlation non-significant at $p < 0.01$

Adjustment (p-value): None

Fuel economy data
